ABOUT US

Louvre roof systems and louvre panels can add huge value to your home, creating an artfully designed outdoor space for entertaining or relaxing.

Made from durable, weather-proof materials sourced in NZ, our louvre products are a simple way to revolutionise your outdoor living space and create a stunning entertainment space for you and your family.

As well as protecting you and your home from the sun's harsh rays, our louvre roofs also provide a long lasting solution to covering your outdoor entertainment area – the materials and methods we use ensure durability against the harshest elements.

All our louvre products are made from locally extruded aluminium and are made for NZ conditions and with durability in mind! They come in a vast range of powder-coat colours to truly blend in with your home.
